Current Responsibility

Janet Jennings is a consulting actuary with the Boise office of Milliman. She joined the firm in 2006. Janet manages the actuarial analysts in the Boise office. She spent seven years as an actuarial analyst, 13 years as an associate actuary, and four years as a consulting actuary.

Professional Work Experience

Janet works with corporate, public, and multiemployer clients on conducting postretirement OPEB experience studies, valuations, and GASB 74/75 disclosures. Her other consulting assignments include plan and assumption studies, RFP analysis, and estimations of liabilities and reserves utilizing IBNR. Janet also works on Medicare Part D attestations and is a retiree drug subsidy (RDS) designee.

Janet also has experience with project management, Six Sigma process management, and software development.

Professional Designations

- Associate, Society of Actuaries
- Member, American Academy of Actuaries

Education

BS with honors in Mathematics and Physics, William and Mary

Presentations and Publications

Janet has spoken before consultants and professional associations on postretirement benefit valuations, project management, and the RDS process. Janet has provided legislative updates to the Employers' Health Coalition of Idaho.
